Subject: Community involvement appendices
Attachments: Silver Bow FYR Appendix I and J 05262015.docx

Flag: Follow up

Appendices I and J are attached. These include the press notices and interview forms or comments received.

At the moment there are approximately 100 pages of unedited comments from Mr. Ray.

Treat

Subject: Silver Bow initial draft

Good afternoon – Attached is the current draft of the Silver Bow FYR. As a reminder, there are still gaps and comments in this version for us to review and discuss.

In addition, we are still waiting on several things that will need to be incorporated into this draft. In some cases we have recently received information that we have not yet been able to incorporate. However, as we have discussed, we did not want to hold up getting you a draft so that our discussions about how to handle certain things can be discussed over an actual report in your hands, instead of in a theoretical way.

Also, we are still waiting on several items from you that will help inform sections of the report. The two primary pieces we are expecting include:

- The 2011-2014 GW report
- The confidential white paper on Parrot tailings, etc.

Also, we just received the CTEC comments today and need to summarize them for inclusion in the interview section.

I will be sending along the files for the appendices separately (due to their size).

Once you are all able to take an initial look at the report, it may be helpful to have a call and go over any big picture concerns? I know that you are working in a focused way on the community involvement issue. Please let us know if you would like to talk through any of those aspects again.

I also know that I will likely need to work through some of the specific comments and issues in the report directly with Nikia.

Please let us know if you would like to talk about developing an approach for receiving tracked changes from you will improve efficiency and ensure we do not have conflicting remarks?

Again, I want to emphasize that we are hoping this draft will allow us to work with you to move forward on many of the outstanding issues.

Sincerely,
Treat
